

## SETTING THE STANDARD FOR CONSTRUCTION COMPLIANCE TRAINING

Vivid Learning Systems is pleased to now offer online construction safety training. These on-demand courses offer the necessary flexibility in this changing business market. Employers will find the use of online coursework to be of great value as courses can be completed when time allows and where Internet access is available. Enroll an individual or your entire staff and track course completion with the use of eClarus Lite and eClarus Enterprise.

Course offerings exist in a variety of topics that support construction activities. These courses are ideal for new employee orientation, refresher training or as an introduction to subject matter.

The suite of OSHA Construction Safety courses has been custom developed in conjunction with AGC of Minnesota to provide the imagery and regulatory content to meet the needs of the construction industry. An OSHA 10 hour Construction Outreach card is also available.
